## ToooAir PTT Application Guide

ToooAir Push to Talk application guide is an in-depth guide to the user control and settings definitions of the application. The application is a powerful tool that can be used on both Android and iOS phones. This application connects a smartphone to the TooAir PTT broadcast system and offers a light weight mobile visual dispatch solution.

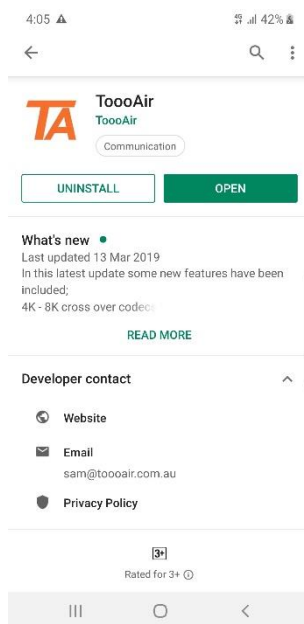

Note:

Some of the features may be different depending on version installed, smartphone device and the access permissions granted to the user. This guide is current with version 8.1.6.27.

## Installation

You can install the TooAir either via the Google Play Store, Apple Store or our Website.

### Google Play Store

Open Google Play Store or Apple Store and search TooAir, tap on TooAir and tap Install. Once the install has finished open the app and grant the requested permissions. Please note if you do not grant all permissions some functionality of the app may not operate as intended.

### ToooAir Website

If you would like to access the app from our website navigate to our resources page: <https://www.toooair.com.au/Resources.aspx>  
Tap on TooAir PTT Android APK to begin the download. Once downloaded tap to install the APK. You may be prompted to enable "install from untrusted APKs" enable this setting and tap to install the APK again. Once installed open the app and grant the permissions requested. Please note if you do not grant all permissions some functionality of the app may not operate as intended.

Get the App

ToooAir PTT Android APK

Area: Australia

Account: *Enter Account*

Password: *Enter Password*

# Navigating The App

## App Interface

TooAir PTT application interface is broken up into four tabs;

You can select a different tab by pressing the icons or by swiping your finger across the screen left or right.

### PTT Button

Press and holding down the PTT button, will commence the apps transmission. You will be prompted by a “My Turn to Speak” message.

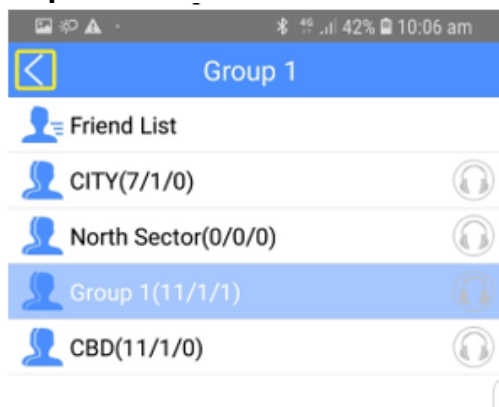

### SOS Button

Press and hold the SOS button for 3 seconds to trigger an SOS alert to all other users on your fleet.

## Groups

Navigating through your groups is as simple as tapping on the group you would like to enter, once tapped a voice over will speak stating the group you are entering.

You can leave a group by tapping the back arrow  and then tapping on a different group.

# User Interaction

## Individual / Group Calls

Once you've entered a group you can see the user display list. From this list you can create individual or group temporary calls. You can also send messages, track, force to join and disconnect other users.

### Individual

Find a desired user, tap and hold on the user until the user interface appears. Select Private Call to start the individual call. Tap the back arrow to exit the individual call.

### Group

For a temporary multi-call tap the tick boxes next to desired users, once all users are selected press the PTT button to begin the temporary group call. Tap the back arrow to exit the individual call.

Note this method can also be used for individual calls.

To access the user interface, tap and hold on the desired user this interface will give you access to additional features.

### Send Message

Tap Send Message to send the desired user a message, once tapped the app interface will change to the Msg tab.

### FORCE TO JOIN

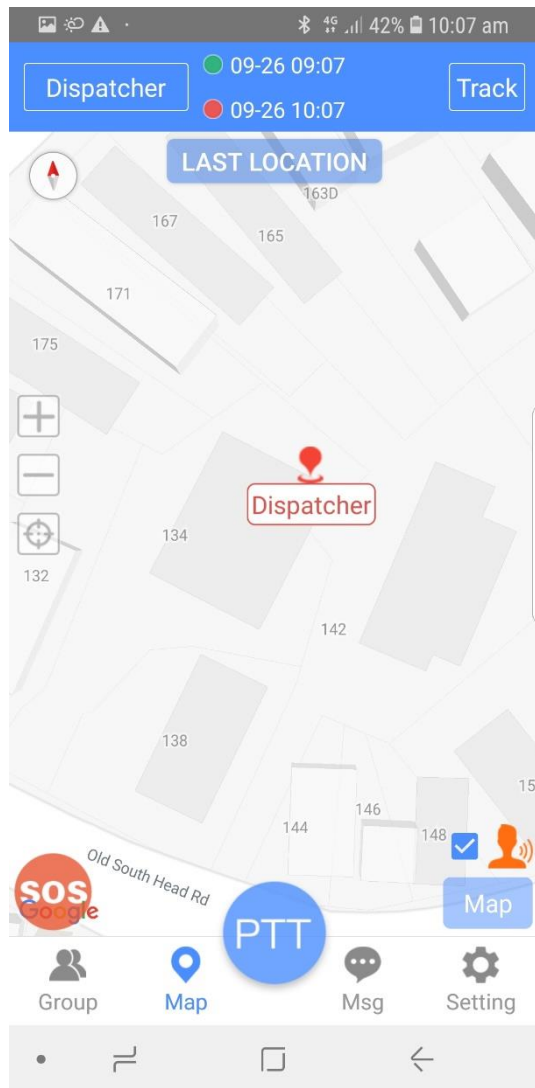

Tap Force to Join to force desired user to join current group.

### DISCONNECT

Tap Disconnect to force desired user to leave current group.

## Map Interaction

### Map Tab

By tapping the Map tab, you can access the map interface, from this display you can locate your users and view track logs.

### Latched Calling Position

Enabling latched calling position allows the map to re-centre to a transmitting user.

### Last & Real Time Location

This feature toggles which users are displayed on the map.

**Last location** is the last known location a GPS lock was transmitted by a user and will display offline users on the map.

**Online Location:** will filter the users display to online users only.

**Real time location** will only show online users that currently have a GPS lock.

### Tracking

The map display tab offers the ability to view track logs of users, to view a track log;

1. Select a user from the drop-down list (Tap the top left button)
2. Select a date and time, start being the green dot and red being the end date.  
*Note. you can only choose a date and time with in a 24-hour interval.*
3. Tap Track!

## Messages

---

### Message Tab

In this interface tab you will see the message display this will display all the messages that you have received or sent. You can tap into a message to send more messages. Tap the back arrow to exit out of an individual message.

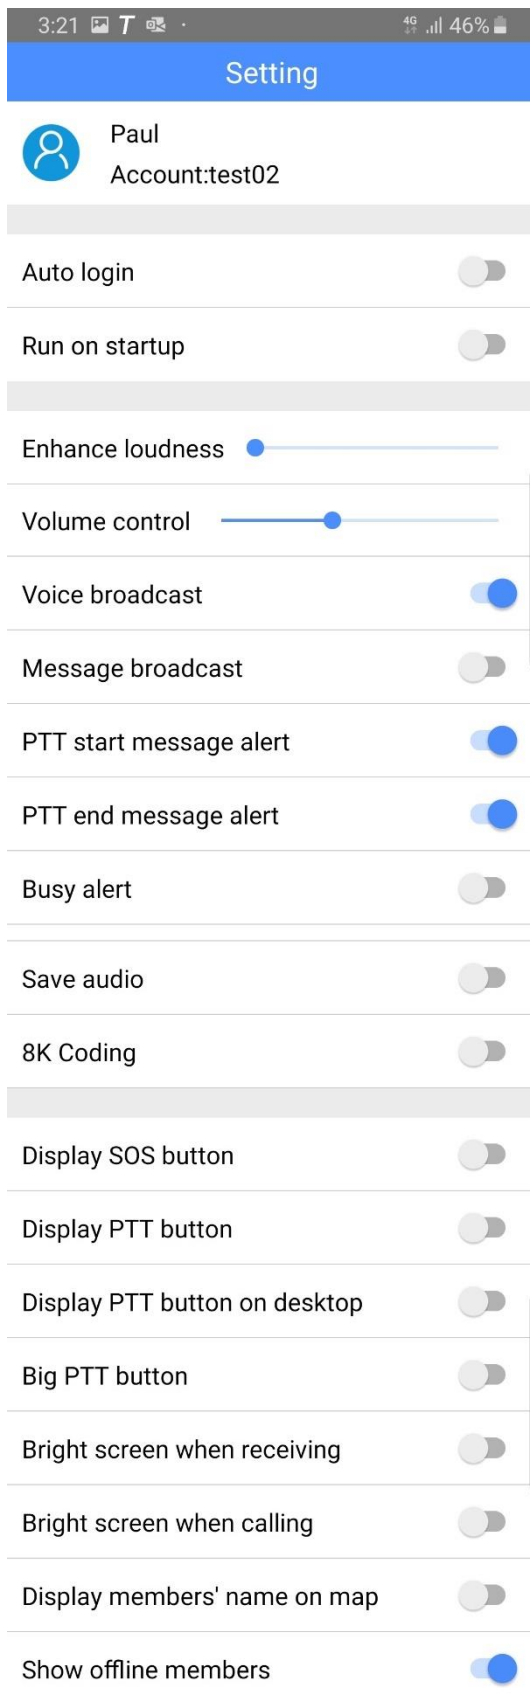

### Clear

Enter the desired message you wish to clear and tap the Clear button (Located top right), you will be prompted with a clear message tap OK.

## Settings Explained

### Settings Tab
